ABOUT

I am a Boston-grown, newly Raleigh based designer with 20 years experience. I love my home based office, complete with IT husband and lounging dog.

My combination of advertising agency experience + financial design training + non-profit passion projects have made me a well-rounded problem solver for all size projects. My joy of book design was the perfect path to fine tune my typography skills. It also taught me to conceptualize and layout high quality projects at a fast pace.

Speed and talent are the keys to my success as a professional designer. I have experience in all walks of design, from logos to a annual reports. I love to combine smart design and marketing strategies to solve brand challenges, grow businesses, raise funds, and spread awareness.
